

APD 500

Launched in 2017, the APD 500 was developed to provide a robust and durable patient stretcher lifting solution. Designed and manufactured with symmetrical hydraulics, the lift ensures equal load distribution to accommodate heavy duty lifting requirements.

The APD 500 lift has been successfully tested for mechanical performance of 120,000 lift cycles with 500 kg weight.

The XL-APD 500 incorporates the following features;

- Identical features listed to AP 500
- Same weight as AP500
- Platform and lifting gear angle sensors
- Three hydraulic rams 2 x Tilt and 1 x Lift (Anti-corrosive cylinders)
- Symmetric load distribution on the lifting gear
- "Electrical" auto tilt at ground level
- Fully CE marked

Options:

- Handrails (Fixed or Telescopic)
- Optional colour codings
- Anti slip platform surface
- 2 button / 4 button Wanderlead
- Various manual override configurations
- Manual/Automatic bridge plate
