

MD10000 MOVING DECK LIFT

- Trailer-mounted 24V Electro-Hydraulic Moving-Deck system
- 10 Tonne Lifting Capacity
- Helps maximise use of available trailer volume
- Facilitates swift and efficient loading and unloading of trailer
- Deck held securely once it has reached its upper height
- Manual over-ride system permits emergency operation
- External framework safety gate opening electromechanically interlocked with platform position. Control system only permits external gates opening when the platform has reached the respective floor level
- Split, concertina or sliding external safety gates available depending on customer requirements
