

BESPOKE LIFTS

WALL MOUNTED GOODS LIFT

- The above electro-hydraulic lift was constructed to carry bakery goods.
- Access XL carried out all design, construction, installation and handover of the lift on site.
- The lifting height was 1300mm and the capacity of the lift was rated to 1000kg.
- Power supplied by 240V single phase.
- Lift call buttons provided at the entry points along with up, down and emergency stop buttons on the top and bottom floor level.
- Chequered plate on the platform surface provided a non-slip surface.
- Emergency lowering provided using a manual emergency release valve fitted on the power pack.
- Powder coated finish.
